CFGS DAI

La Salle Gracia | 05 - 07

EXPERIENCE

FREELANCE SOFTWARE ARCHITECT

Jan 20 - Currently

Technology consulting and software development. Creating software infrastructure for different types of requirements. Microservices, Observer, Singleton, MVC or REST are the most common software patterns that I use in the last time, but not the uniques. Autoscaling infrastructures in AWS for optimize the software response and Terraform for manage it. Security patterns like JWT, doble factor, JWT with private key. Leading the technological change and tech team for a big national company. Creating backend technology, frontend, product redesign and apps for iOS and Android. Adapting to client technologies and languages.

Companies: La Caixa, Calidad Pascual, IDOM

Technologies: Spring Boot, Python3, ReactJS, React Native, AWS, Terraform, Elastic Search, MongoDB, MySQL, Docker,
